

In 1Q 2022 ENGIE Energía Perú was a leading player of the sector accounting for 19.4% of the total capacity and 7.1% of the total energy generation of the country.

## **Corporate Overview**

We aim to remain at the forefront of the energy transition

2,496 MW installed capacity

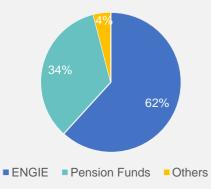

19% national installed capacity

25
years
operating
in Peru

8 plants operating 2,300 MUSD invested since 1997

## **Global Sponsor**

ENGIE Energía Perú is controlled by ENGIE S.A.(61.77%), the world's largest independent energy producer, with an installed capacity of 100GW of which 34.2GW renewable. ENGIE has a strong link in energy value chain, from low-carbon generation to the provision of energy-efficient solutions for all its customers.

#### Our business model

# Renewable energy

In line with our decarbonization strategy, we are expanding our renewable energy portfolio

## Thermal energy

We operate power generation plants that allow us to meet the demand of our customers with the greatest efficiency, reliability of supply and at competitive prices.

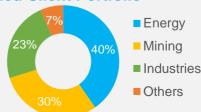

#### **Transmission lines**

We have transmission lines of 138, 220 and 550 kV that allow us to inject the energy produced in our plants into the national interconnected electrical system.
